Transition standard Annex A

FICTIONAL COMPANY DATA. Controlled version 2, approved by Operations Director on 15 September 2026. Applies to Alder Services Hong Kong managed workplace services. External proposal use approved.

Issue control: a shared register records issue owners, actions and closure. The client reviews progress weekly. Unresolved transition issues escalate to the Operations Director within one working day.

Handover control: test readiness and obtain the client's signed readiness checklist before handover. This is a readiness control, not a promise that every incident will be prevented.

Boundary: the one-working-day escalation applies to unresolved transition issues. It is not an emergency incident-response SLA. Named resources and start dates require a separate workload check and approval.
